MONTILE[®]

PRODUCT SELLING POINTS:

1. Double Zero Water Absorption

Industry-leading ultra-low water absorption rate, far exceeding national standards. Water absorption is $\leq 0.1\%$ (some products as low as 0.05%), ensuring superior moisture resistance and long-term durability.

2.5°–9° Low Light Reflection

Designed with refined low-light technology to achieve a soft, comfortable visual effect. The surface gently diffuses light, reducing glare while maintaining a warm and natural ambiance.

3. Imported Glazes

Made with premium imported glazes to ensure outstanding surface quality and enhanced stain resistance, improving durability by over 20%. Advanced glaze formulation and firing techniques ensure even distribution, resulting in a refined texture and long-lasting finish.

4. Monet Dried Granules + Fine Sculpture

Gloss level: $20^{\circ} \pm 5^{\circ}$.
 Inspired by Monet-style granulation, combined with precision firing to naturally recreate delicate surface textures.
 The result is a soft, tactile finish with subtle depth, evoking the elegance of handcrafted artistry.

5. Engraved Mold

Each tile is produced using precision-engraved molds. From material selection to processing, every detail is carefully controlled to achieve exceptional consistency, texture, and dimensional accuracy.

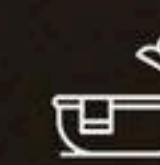

6. Applicable Spaces

Ideal for a wide range of applications, including:
 Residential interiors, Bathrooms, Corridor, Cafés, Balconies, Entrance halls, Feature walls, Outdoor areas

NOTE

PRECAUTIONS FOR TILING :

**STEP 1**

Substrate Preparation, Surface Leveling & Dry Conditions

1. Thoroughly clean the installation area. The substrate must be free from hollowness, cracks, oil contamination, dusting, or loose particles. Areas with significant level differences shall be leveled in advance using self-leveling compound or cement-sand mortar.

Flatness tolerance shall not exceed 5 mm within a 2 m² area.

Allow for a finished floor level build-up of approximately 20 mm in advance.

2. The installation area must be kept clean, dry, and free from moisture at all times.

STEP 2

Clean Installation, No Impact Tapping & Dry Grouting

1. It is recommended to use tile adhesive (tile glue) for installation.

Use 1 mm spacers or leveling clips to achieve alignment.

Do not strike tiles with a rubber mallet.

(Cementitious materials undergo continuous curing during the early stage; excessive impact may damage the internal structure and increase the risk of surface cracking.)

2. Patterned or decorative tiles shall be installed strictly in accordance with the factory numbering sequence. Any water, slurry, or contaminants must be immediately removed using an absorbent cloth to keep the tile surface clean and free from sand or debris.

3. Maintain dry conditions throughout the installation process.

Grouting shall only be carried out after a minimum of 24 hours of natural drying following tile installation.

During grouting, masking tape must be applied to protect the tile surface.

STEP 3

Drying, Cleaning, Moisture Protection & Inspection

1. After installation, wet curing is strictly prohibited.

Clean the surface using a slightly damp cloth only, and allow natural ventilation for at least 48 hours until visually dry.

2. After installation and prior to grouting, it is recommended to apply a protective waterproof treatment, which can effectively enhance the tile's stain resistance.

3. Once fully dry, clean the tile surface with a dry cloth, ensuring no construction residues (such as timber dust, paint, or coatings) remain.

Cover and protect the surface until all construction works are completed.

Do not use colored, printed moisture-proof films or plywood, as pigment transfer may stain the tiles.

Recommended protective materials include non-woven fabric, felt sheets, or geotextile fabric.

4. Do not apply airtight protective films before the substrate has fully dried, as trapped moisture may lead to efflorescence or surface whitening.

5. Conduct a secondary inspection within 5 days after installation.

Any defects or irregularities shall be rectified promptly.
